

Simran Singh

7267879192 — simransingh25060@gmail.com — [LinkedIn](#) — [GitHub](#) — [LeetCode](#) — [Portfolio](#)

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, C++

Frontend Development: React.js, Next.js, Redux, Tailwind CSS, Material-UI

Backend Development: Node.js, Express.js

Databases & Cloud: MongoDB, Firebase

Tools & Technologies: Git, AWS, Vercel, Postman, VS Code

EDUCATION

Dr. APJ Abdul Kalam Technical University

Bachelor of Technology in Electrical & Electronics Engineering

2023 – 2027

Ghaziabad, Uttar Pradesh

EXPERIENCE

Software Development Engineer Intern — Sthambh

July 2025 - Sep 2025

- Created **responsive, cross-browser compatible UI/UX components** with **React.js**, **Next.js**, **TypeScript**, and **GSAP**, following mobile-first design and accessibility standards
- Built scalable **authentication and authorization systems** with **JWT authentication**, **OAuth 2.0**, **RBAC**, and session management using **Next.js**, **Node.js**, **Express.js**, reducing login latency by **20%** and enhancing security

TECHNICAL PROJECTS

Promptiqo — AI Chat Application

[Live Demo](#) [GitHub](#)

React.js — Node.js — Express.js — MongoDB — Google Generative AI — Clerk Auth — ImageKit — React Query

- Developed **AI-powered conversational chat application** leveraging **Google Generative AI API** for intelligent question answering and content generation, featuring real-time markdown rendering with **react-markdown** and dynamic typing animations
- Built scalable **full-stack architecture** using **React.js** with **React Router** and **TanStack Query** for state management, integrated with **Node.js/Express.js** backend and **MongoDB** for persistent chat history and user data storage
- Implemented **secure authentication** using **Clerk Auth SDK**, image upload functionality with **ImageKit CDN**, and optimized performance with efficient API request handling and client-side caching strategies

SpiceHop — Food Ordering Platform

[Live Demo](#) [GitHub](#)

React.js — Node.js — Express.js — MongoDB — JWT — Bcrypt — Cloudinary — ImageKit — Axios — Multer

- Created comprehensive **food ordering platform** with **React.js** frontend featuring **React Router DOM** for seamless navigation, integrated with **Express.js** backend and **MongoDB/Mongoose** for scalable restaurant, menu, and order management
- Engineered **secure authentication system** using **JWT tokens** and **Bcrypt** password hashing, implementing cookie-based session management with **cookie-parser** and **CORS** configuration for cross-origin security
- Integrated **image management** with **Cloudinary** and **ImageKit CDN** using **Multer** for file uploads, enabling restaurant owners to upload menu items and food images with optimized storage and delivery

Scanalyze — PDF Document Analyzer

[Live Demo](#) [GitHub](#)

React Router v7 — TypeScript — PDF.js — Zustand — React Dropzone — Tailwind CSS — Vite

- Developed intelligent **PDF document analysis application** using **React Router v7** and **TypeScript**, leveraging **PDF.js** library for client-side PDF parsing, text extraction, and document rendering with support for multiple file formats
- Implemented **drag-and-drop file upload** using **React Dropzone** with intuitive UI, integrated **Zustand** for lightweight state management to handle document processing workflows and user interactions efficiently
- Built responsive interface with **Tailwind CSS** and custom animations using **tw-animate-css**, optimized build performance with **Vite** bundler for fast development and production deployments

LEADERSHIP & PROFESSIONAL EXPERIENCE

Full Stack Developer — Big Data Center of Excellence

December 2024 - Present

- Led cross-functional team** of 12 developers using **agile/Scrum methodology** to deliver 5+ **production applications**
- Mentored junior developers** in web development, competitive programming, and data structures; organized technical events for **500+ participants**

ACHIEVEMENTS & CERTIFICATIONS

- Delivered technical lecture at **TownHall workshop** covering full-stack development and software architecture for **500+ attendees**
- Solved **150+ problems** on [LeetCode](#), demonstrating strong foundation in data structures, algorithms, and competitive programming
